PROFESSIONAL SUMMARY

Frontend Developer transitioning into Full-Stack Development with hands-on experience building responsive and dynamic web applications using React, JavaScript, and modern web tools. Recently expanded backend skills with Node.js, Express, and MongoDB — including building REST APIs and implementing full CRUD operations. Proven ability to ship real-world projects from concept to deployment, with a strong grasp of component-based architecture and clean UI design.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js

Styling & UI: Tailwind CSS, Responsive Design, Clean UX Principles

Backend: Node.js, Express.js, REST APIs, MongoDB (Mongoose), CRUD Operations

State & Routing: React Router, Component State Management, React Hooks

Tools & Workflow: Git, GitHub, VS Code, Vite

Deployment: Vercel, Netlify, Render

PROJECTS

Personal Portfolio Website — daniels-port-folio.vercel.app

- Built with React, Vite, and Tailwind CSS; fully responsive across all devices.
- Showcases projects, skills, and integrated contact section.
- Deployed on Vercel with fast load times and clean UI.

Full-Stack To-Do Application — todo-list-with-react-js-brown.vercel.app/

- React frontend paired with a Node.js/Express backend and MongoDB for persistent storage.
- Implemented REST API with GET, POST, and DELETE endpoints.
- Currently adding user authentication and protected routes.

Sneaker E-Commerce Web App — leinads-sneaks-vercel.app/

- Built with React; features product filtering, dynamic routing, and a functional shopping cart.
- Focused on responsive layout and smooth UX interactions.
- Deployed and live on Vercel.

- MERN Stack application.

Space Tourism Website—{space-tourism-site-gamma.vercel.app/}

- Fully responsive, visually rich UI with interactive navigation and section transitions.
- Focused on modern design principles and polished user experience.

Global Weather App—{sky-view-forecast.vercel.app/}

- Built with React, Tailwind CSS, and Axios; integrated with OpenWeatherMap API for real-time weather data.
- Implemented city search, 5-day daily forecast, and hourly breakdown with a day selector.
- Handled raw API data transformation — filtering and grouping 40 forecast entries into daily and hourly views.
- Metric and Imperial unit toggle with live API refetch on unit change.
- Deployed on Vercel.

EDUCATION

Michael Okpara University of Agriculture, Umudike

B.Sc.Ed. Agricultural Science Education | 2018 – 2023

Self-taught developer; pursued frontend engineering independently alongside academic studies.

ADDITIONAL STRENGTHS

- Strong debugging mindset — experienced in resolving API issues, routing conflicts, and deployment errors.
- Fast, self-directed learner with a track record of shipping real projects.
- Comfortable with real deployment environments (Vercel, Netlify, Render).
