PROFESSIONAL SUMMARY

Junior Full-Stack Developer with hands-on experience designing, building, and deploying complete MERN stack applications. I've built everything from authenticated e-commerce platforms and bus booking systems to API-driven weather apps and book discovery tools — all shipped and live. I'm comfortable across the full stack: React on the frontend, Node.js and Express on the backend, MongoDB for data, and platforms like Vercel and Render for deployment. I enjoy solving real problems with clean code and I'm looking for a team where I can contribute from day one and keep growing.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, React Hooks, React Router

Styling & UI: Tailwind CSS, Responsive Design, Clean UX Principles

Backend: Node.js, Express.js, REST API Design, JWT Authentication, bcrypt

Database: MongoDB, Mongoose ODM, CRUD Operations, Data Modelling

APIs & Tools: OpenWeatherMap API, Google Books API, Paystack, Axios, Git, GitHub, VS Code, Vite

Deployment: Vercel, Netlify, Render

PROJECTS

BusGo — Bus Transportation Booking App — [bus-go-two.vercel.app](#)

[MongoDB](#) · [Express](#) · [React](#) · [Node.js](#) · [Paystack](#) · [Vite](#) · [Tailwind CSS](#) · [Vercel](#) / [Render](#)

- Full-stack MERN bus booking platform built as a technical assessment for Renaissance Innovation Labs (RIL).
- Users can browse available trips, select seats, and complete bookings through an intuitive multi-step flow.
- Integrated Paystack payment gateway for secure, real-world payment processing.
- Supports both authenticated users and guest checkout — flexible auth flow that doesn't block the booking experience.
- RESTful API built with Express handling trips, seat availability, bookings, and payments.
- Data persisted in MongoDB; frontend built with React/Vite and styled with Tailwind CSS.

Sneaker E-Commerce Platform — [leinads-sneaks-vercel.app](#)

[MongoDB](#) · [Express](#) · [React](#) · [Node.js](#) · [JWT](#) · [Vercel](#) / [Render](#)

- Full-stack MERN application — users can register, log in, and manage their accounts with JWT-based authentication.
- Product catalogue stored in MongoDB with Mongoose; supports dynamic filtering and category routing.
- Persistent cart and order management — each user's orders are saved to the database and tied to their account.
- RESTful API built with Express handling auth, product, and order endpoints.

Full-Stack To-Do Application — [todo-list-with-react-js-brown.vercel.app](#)

[MongoDB](#) · [Express](#) · [React](#) · [Node.js](#) · [JWT](#) · [Vercel](#) / [Render](#)

- Complete MERN app with user registration, login, and JWT authentication — each user's data is fully scoped to their account.
- Protected routes on both frontend and backend; unauthenticated users can't access task data.
- REST API with GET, POST, PUT, and DELETE endpoints for full task lifecycle management.

BookVerse — Book Discovery App — [leinads-book-verse.vercel.app](#)

[React](#) · [Vite](#) · [Google Books API](#) · [Font Awesome](#) · [Vercel](#)

- A book discovery app that pulls live data from the Google Books API — search any title and get full details instantly.
- Sidebar navigation built with Font Awesome icons for a clean, intuitive browsing experience.
- Fully responsive layout deployed on Vercel with fast load times via Vite bundling.

Global Weather App — [sky-view-forecast.vercel.app](#)

[React](#) · [Tailwind CSS](#) · [Axios](#) · [OpenWeatherMap API](#) · [Vercel](#)

- Real-time weather app with city search, 5-day daily forecast, and hourly breakdown with a day selector.
- Handled raw API data transformation — filtering and grouping 40 forecast entries into clean daily and hourly views.
- Metric and Imperial unit toggle with live API refetch on unit change.

Space Tourism Website — [space-tourism-site-gamma.vercel.app](#)

[React](#) · [Tailwind CSS](#) · [Vite](#) · [Vercel](#)

- Visually rich, fully responsive UI with interactive navigation and smooth section transitions.
- Built with a focus on modern design principles, clean layout, and polished user experience.

Personal Portfolio Website — [daniels-port-folio.vercel.app](#)

[React](#) · [Vite](#) · [Tailwind CSS](#) · [Vercel](#)

- Showcases all projects, skills, and contact integration — fully responsive across all devices.
- Fast load times thanks to Vite bundling and Vercel CDN deployment.

EDUCATION

Michael Okpara University of Agriculture, Umudike

B.Sc.Ed. Agricultural Science Education | 2018 – 2023

Self-taught MERN stack developer — transitioned into full-stack engineering independently, building and shipping real projects throughout.

ADDITIONAL STRENGTHS

- End-to-end project ownership — designed, built, debugged, and deployed every project independently.
- Experience integrating real-world payment systems (Paystack) and third-party APIs into production apps.
- Strong debugging mindset across the full stack: API errors, auth flows, database queries, and UI issues.
- Fast, self-directed learner with a consistent record of completing and shipping real projects.
