PROFESSIONAL SUMMARY

Junior Full-Stack Developer specialising in the MERN stack, with hands-on experience building and deploying full-stack web applications. I work across frontend and backend development using React, Node.js, Express, and MongoDB, with experience building authentication systems, REST APIs, database-driven features, and responsive user interfaces. I enjoy turning ideas and requirements into functional products, solving problems through practical development, and continuously improving my ability to build reliable and maintainable applications.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, React Hooks, React Router

Styling & UI: Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, bcrypt

Database: MongoDB, Mongoose, CRUD Operations

APIs & Tools: Axios, Google Books API, Git, GitHub, Vite, VS Code

Deployment: Vercel, Render, Netlify

EXPERIENCE

Full-Stack Developer — Banley / Kudagon - banley.kudagon.com.ng

2026

- Built and implemented responsive application pages as part of the Banley platform.
- Implemented and refined product features across the application.
- Contributed to the development of the portfolio calculation engine.
- Worked on calculation logic involving capital, targets, fees, profits, and rollover strategies.
- Collaborated with other developers using Git branches, pull requests, and code reviews.

SELECTED PROJECTS

Farm Companion — An AI Powered Farm Manager — ai-farms.vercel.app

MERN Stack

- A farm management application focused on helping smallholder farmers manage their farming activities.
- Built a MERN-based application for managing farms, crops, and livestock.
- Implemented user authentication and protected application features.
- Built crop and farm management functionality.
- Added weather-powered farming information and agricultural recommendations.
- Integrated AI-powered features for farming assistance.

BusGo — Bus Transportation Booking App — bus-go-two.vercel.app

MERN Stack

- Built a full-stack bus transportation booking application.
- Implemented trip browsing and seat selection functionality.
- Built the booking and payment flow.
- Integrated Paystack for payment processing.

- Developed backend APIs using Node.js and Express with MongoDB for data persistence.

Restaurant Tip Manager — daniels-banley-assessment.vercel.app

React + TypeScript

- Built a restaurant tip management application using React and TypeScript.
- Implemented tip recording and management functionality.
- Used IndexedDB for local data persistence.
- Built dashboard statistics, tables, filtering, and related management interfaces.
- Implemented form validation and reusable application logic.

SecureBank — Powerful Interbanking — ease-swift-banking.vercel.app

MERN Stack

- Built a full-stack banking application using MongoDB, Express, React, and Node.js.
- Implemented user authentication and secure account functionality.
- Built money transfer functionality and transaction records.
- Implemented PIN security features.
- Built an administrative dashboard for managing banking-related operations.

Book Verse — leinads-book-verse.vercel.app

MERN Stack

- Built a digital library and book discovery application using the MERN stack.
- Integrated the Google Books API for book discovery.
- Implemented user authentication and personalised library functionality.
- Added reading progress and favourites.
- Built an embedded book viewer with theme and font customisation.

EDUCATION

Michael Okpara University of Agriculture, Umudike

B.Sc.Ed. Agricultural Science Education | 2018 – 2023

Self-taught MERN stack developer with practical experience building and deploying full-stack applications.

ADDITIONAL STRENGTHS

- End-to-end experience building and deploying personal and team-based applications.
- Practical experience with frontend and backend development.
- Experience working with APIs, authentication, databases, and RESTful services.
- Comfortable working with Git branches, pull requests, and collaborative development workflows.
- Strong problem-solving and debugging approach.
- Continuously developing full-stack engineering skills through practical projects.
